## Reconstituted viral envelopes as delivery vehicles for nucleic acids

de Jonge, Jørgen Martin

**IMPORTANT NOTE:** You are advised to consult the publisher's version (publisher's PDF) if you wish to cite from it. Please check the document version below.

*Document Version*

Publisher's PDF, also known as Version of record

*Publication date:*

2007

### Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

### Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

## LIST OF PUBLICATIONS

- [1] J. de Jonge, J.P.Amorig, W.L.J.Hinrichs, J.Wilschut, A.Huckriede, H.W.Frijlink, Inulin sugar glasses preserve the structural integrity and biological activity of influenza virosomes during freeze-drying and storage, Submitted.
- [2] J. de Jonge, J.M.Johanna M.Leenhouts, M.Holtrop, P.Schoen, P.Scherrer, P.R.Cullis, J.Wilschut, A.Huckriede, Efficient gene transfer mediated by influenza virosomes with encapsulated plasmid DNA, Submitted.
- [3] J. de Jonge, M.Holtrop, J.Wilschut, A.Huckriede, Reconstituted Viral Envelopes, *Cellular Delivery of siRNAs*, BIOforum Europe 4 (2006).
